

SECURES EVOLVING PAYMENTS LANDSCAPE

Cardinal Health, one of North America's largest healthcare supply chains, has partnered with **Worldpay B2B Payments** for over 15 years to secure commerce. The supplier needed a partner with deep experience in integrating secure payments. And since Cardinal Health was constantly growing through mergers, acquisitions and expansion, it needed a solution that would seamlessly connect across its complex enterprise environment of varied channels, multiple systems and application as well as across borders.

Cardinal Health and Worldpay B2B Payments manage the array of electronic payment sources including call centers, website, eCommerce, and through a secure customer portal. The flexible, cloud solution is easily deployed into the company's 10-20 yearly acquisitions and the tokenization technology protects sensitive customer data from a breach across the ever-evolving enterprise.

In addition to payment security and streamlined automation across the enterprise, the Worldpay B2B Payments solution has lowered Cardinal Health's annual interchange costs and the company has achieved Level 3 savings – a million dollars in savings to date.

Partnering with Worldpay B2B Payments since 2005 for flexible, secure integration

“We were looking for a turnkey solution to address each new acquisition without delays in payments and continued automation. Worldpay B2B Payments helps us meet that goal. It has decreased our time and effort to complete the PCI DSS audit and given us a secure, integrated payment solution.”

“We have significantly lowered interchange costs, and we have more predictability in costs over the long run. As we move ahead, we are adding new payment solutions to give our repeat customers added convenience.”

Brent Blackburn,
Software Engineer, Cardinal Health

About Cardinal Health

Location: Dublin, Ohio

Industry: Healthcare Services

Employees: 37,000

With almost 100 years of experience, Cardinal Health, Inc.
