

Drive AI-powered, future-ready accounts receivable processes

Modernize your credit-to-cash cycle with predictive accounts receivable software from FIS

Accounts receivable teams are responsible for handling high volumes of transactions that require significant speed and precision. However, they often manage these sensitive details manually, lacking the necessary visibility and control to optimize the process, which puts cash and reputation at risk.

Automate the AR lifecycle with **FIS GETPAID**

FIS GETPAID is a cloud-native, AI-powered platform that's designed to transform the receivables lifecycle. As a fully integrated, end-to-end order-to-cash solution, GETPAID enables you to significantly improve your cash flow by reducing outstanding accounts receivable with intelligent AI capabilities.

Why **GETPAID** on Microsoft Azure?

Increase cashflow

Reduce days sales outstanding and improve cashflow by up to millions of dollars.

Mitigate risk

Deploy AI to recalibrate collection priorities and help your credit managers identify risk.

Improve operational efficiency

Drive AR automation across order-to-cash processes, from credit and collections to cash application.

FIS + Microsoft: Delivering valuable innovation to accounts receivable

FIS GETPAID is fully integrated with the Microsoft ecosystem, allowing you to optimize the value of your investments. GETPAID on Azure delivers advanced capabilities that enhance productivity in your credit and collections departments on a robust, secure cloud infrastructure.

Streamlining Datasite's global credit and collections operations

Pairing innovative technology with industry expertise

Datasite is a global SaaS provider of AI-powered workflow collaboration and automation solutions. Recognizing opportunities to enhance workflow efficiency and deepen account visibility, Datasite wanted a system designed specifically for credit and collections to support its wide array of customers.

Improving operational efficiency for a global workforce

Datasite selected FIS GETPAID for its user-friendly interface that's designed especially for credits and collections. FIS's knowledgeable professional services teams provided Datasite with the ideal mixture of technology and expertise to transform Datasite's collections operations, providing a standardized process for its global operations.

Results

With FIS GETPAID, Datasite realized significant benefits, including:

- A 3-point reduction in 90+ day overdue accounts
- Eliminating 750 accounts from the monthly backlog
- Empowering collectors to easily manage high account volumes

"GETPAID allows me to drill down into each customer account when reviewing for monthly reserves. Our collectors now handle large volumes of accounts with ease."

Karrie Lynch,
Director of Credit &
Collections at Datasite
