

FIS® is transforming the post-trade landscape with the FIS Post Trade Processing Platform (formerly Torstone), a cutting-edge, cloud-based Software as a Service (SaaS) platform.

Our real-time, flexible and future-proof solution integrates middle-office, accounting, settlement, securities lending, corporate actions, collateral management and treasury on one powerful integrated platform.

Following a long period of post-trade technology dominated by incumbent legacy vendors, a new set of market drivers have come to the fore. T+1 settlement, the growth in retail self-service models – spearheaded by a tech-savvy generation, the increased demand for diversity in investment products such as fractional share trading, and the rise of digital assets and tokenization are forcing financial institutions of all sizes to look to modernize their post-trade operations for the benefit of their customers. The underlying technology systems must both manage costs and drive competitiveness.

KEY FEATURES AND BENEFITS

Easy deployment and maintenance: The FIS Post Trade Processing Platform is a secure, scalable and cost-effective cloud-based SaaS solution.

Seamless updates: Regular monthly releases eliminate the need for costly and time-consuming upgrades to stay on track with the latest version.

Cross-asset, multi-entity, multi-currency and multi-location coverage: We support a wide range of asset classes, including equities, funds, fixed income, money markets, FX, commodities, listed and OTC derivatives, cryptocurrencies and tokenized assets. This coverage provides a truly comprehensive solution on a single, integrated platform.

Open API architecture: Seamless integration with existing systems ensures smooth migration and facilitates future expansions.

Configurable rules engine: A highly configurable rules engine enables adaptability to grasp business opportunities and flex in changing market conditions and regulatory requirements.

Flexible configuration layer: Our real-time support team manages change and support requests quickly, avoiding the delays or lengthy wait times typical with other legacy technologies.

Global market connectivity: Connectivity to leading front-office trading platforms and all major markets makes trade processing efficient and reliable. The platform also connects easily with new venues and market infrastructures as they become available.

Efficient exceptions management: Our integrated platform allows faster resolution by identifying exceptions in real time, eliminating the need to monitor issues constantly.

"FIS' post-trade platform has demonstrated the ability to meet and even exceed our requirements. They are providing a highly flexible cloud solution capable of scaling, when required, to provide us with the confidence we need to continue to press our growth strategy."

Why FIS?

FIS is uniquely positioned to address the challenges faced by sell-side financial institutions in the post-trade environment. By replacing disparate legacy systems with a single, integrated cloud platform, we streamline workflows, improve access to critical information and enhance overall operational efficiency. Our modular, "out-of-the-box" approach and global presence make it easy to deploy and maintain a solution that meets your needs, ensuring a smooth transition and long-term success. Experience the future of post-trade processing in the cloud.

FIS is the award-winning global post-trade solution provider for securities, derivatives and digital assets, allowing clients to process cross assets, anywhere, anytme. Grow your business and expand your capabilities.

Contact us to learn more about how our innovative platform can transform your business.

"We decided to move to FIS and bring our operational processing back in-house in order to leverage a cloud-based, cross-asset platform, providing us greater transparency and control over our business, and presenting an opportunity to reduce our total cost of ownership."

Director, Head of Operations, Credit Suisse Canada &
Bahamas

"As a forward-thinking organisation, the decision to implement FIS' platform enables us to keep providing the level of service our customers expect from us. Our clients will benefit from our flexibility to use the FIS cloud platform and the assurance that Stifel Europe will support them through any market or regulatory challenges."

COO, Stifel Europe

We understand sell-side needs because our post-trade platform was built by and for a global investment bank.
