

FIS Securities Processing Suite

Unlock agility and maximize growth with an
integrated cross-asset processing platform

The FIS logo is located in the bottom right corner. It features the letters 'FIS' in a bold, sans-serif font. The 'F' and 'I' are green, while the 'S' is a lighter shade of green. Above the 'I' are three small green dots.

Empower post-trade operations with an integrated cross-asset processing platform for sell-side institutions

Increased regulatory scrutiny. Unpredictable tech costs. Disruptive competitors. Thinning margins. The pressures banks and broker-dealers are currently facing are reshaping the economics, strategy and operations of their businesses.

To stay ahead of market change, firms need flexibility to expand their offerings, meet customer demands for real-time processing and enhanced transparency, and reduce the cost, complexity and risk of their operations to keep money hard at work in a complex, increasingly tech-driven landscape.

That's why we've brought all our industry-leading post-trade processing solutions together in our integrated Securities Processing Suite.

Unlock the next generation of securities processing with FIS

FIS® Securities Processing Suite provides an innovative ecosystem of post-trade solutions for cross-asset processing. Quick and easy to implement on a SaaS basis, it will help you win and retain business, boost your efficiency and margins, and gain the agility you need to outpace market change, maximize growth and put your money to work.

It is uniquely designed to process securities, derivatives and digital assets with unmatched efficiency. The solution consolidates and automates your security processing, providing real-time processing capabilities on a SaaS-based integrated platform. Securities Processing Suite streamlines your post-trade processing for greater agility and a lower total cost of ownership (TCO), while delivering smarter operations, total lifecycle support and a quicker return on investment.

Backed by next-generation SaaS technology, decades of industry experience and our dedication to innovation and strategic partnership, you can refocus on your real business – from trade capture and order management to settlement and asset servicing – while giving your customers the actionable access they demand.

Reduce TCO

SaaS-delivered end-to-end automation for cross-asset processing eliminates the cost of managing multiple solutions and unlocks operational efficiencies to slash overheads.

Win and retain more business

Modernize post-trade operations and provide the real-time processing capabilities today's investors expect to attract more business.

Unlock agility and growth

An integrated, cloud-based securities processing platform supporting a full range of asset classes and trading strategies makes it easy to move into new markets and stay ahead of market change.

Support the full middle-to-back post-trade lifecycle

An innovative ecosystem of modular solutions for cross-asset processing delivers end-to-end automation capabilities, from accounting, securities lending and corporate actions processing to collateral management, treasury and data management, eliminating manual workarounds and the need for multiple systems. Add new middle- and back-office components when you need them and configure the solution quickly to the next market requirement, whether T+1, T+0 or 24/7 trading. And by seamlessly integrating with market infrastructures and front-office trading and risk solutions, you can easily expand product offerings and asset classes and respond quickly to new business opportunities and client needs.

Take the pain out of implementation and maintenance

Securities Processing Suite is a cloud-based platform delivered on a software-as-a-service basis, making deployment quick, easy and low risk. Our fully integrated, adjacent and complementary managed services eliminate key redundancies and alleviate the strain on your IT resources. And with a business-process-as-a-service (BPaaS) option, you'll be able to cut more costs, improve scalability and help money work even harder by outsourcing your post-trade operation to FIS.

Powerful tools for enhanced responsiveness

A web-based real-time portal supporting account inquiry, trading, cash management and reporting gives advisors ready tools to manage their clients' portfolios. Mobile and web-based digital portals empower retail investors to view, trade and manage their brokerage accounts seamlessly.

Supercharge your post-trade operations

Unlock the next generation of securities processing technology to boost post-trade automation and operational efficiencies, maximize growth and make money work harder.

*There are other products within the FIS ecosystem that complement the Securities Processing Suite, offering seamless integration and enhanced functionality to meet your evolving needs.

What do clients say about us?

“The modular platform provides us with a fast, flexible, easily scalable solution that enables us to grow our business and respond to evolving markets effectively.”

Head of Operations, Singer Capital Markets

“The driver was our ability to be the master of our own destiny, rather than be in somebody else’s hands, and everything stems from that. That is the eureka moment, and to be able to say, ‘Look, we can do what we want in our own time.’”

COO, Stifel Europe
