

## CLIENT STORY

# Driving automation and seamless integration ACROSS ASSET FINANCE

A large equipment finance company in the U.S. modernizes asset finance with FIS

One of the largest equipment finance companies in the United States was struggling with aging technology and a broad lack of flexibility across its asset finance operations. A competitive RFP was issued in which FIS was selected as the vendor of choice to help the company modernize its asset finance operations.

The client aimed to leverage FIS Asset Finance, a modern equipment loan/lease core servicing and accounting solution. This modern infrastructure would help in driving portfolio growth, decreasing dependencies on manual processes and lessening the operating risk associated with managing legacy IT infrastructure.

### **FIS Asset Finance helped the client to:**

- Deliver an omnichannel experience through a highly automated workflow, offering quick and flexible finance options and quotations.
- Seamlessly integrate not only with existing systems but also new digital partners and third-party solutions via robust APIs.
- Incorporate their own business rules and extend the application's code independently, without reliance on the technology vendor.

With these advancements, the client is poised for portfolio growth, improved operational efficiency and reduced risk, thereby helping solidify their position as a leader in the equipment finance industry.

## Objective

Modernize asset finance operations.

## Solution

FIS Asset Finance

## Results

Achieved seamless integration and automation, driving portfolio growth.

## Impact:

Boosted operational efficiency and helped the company achieve a competitive advantage.
