

Modern consumer lending, reimagined

Consumers expect the speed and simplicity of fintech when applying for personal loans. Traditional paper-heavy processes slow approvals, frustrate applicants and cause drop-offs.

FIS® Amount™ combines enterprise-scale infrastructure with an innovative, Al-driven platform that streamlines consumer lending origination with digital applications, e-signature, document capture and real-time booking. Banks and credit unions increase approvals, lower OpEx and deliver faster funding while keeping fraud and compliance in check.

Key differentiators

- Embedded risk and compliance: Integrated fraud mitigations ensure regulatory confidence without manual slowdowns.
- Conversion-focused workflows: Streamlined processes accelerate completion and reduce drop-off.
- Cross-channel consistency: One origination platform across digital, branch and call center ensures a seamless customer and member journey.
- Customization without complexity: The Product Configuration Module is a low-code/no-code framework with over 200 configuration options, empowering clients to manage both initial setup and ongoing program management efficiently.

FIS Amount capabilities

- Digital loan application (mobile-first)
- E-signature & disclosure management
- Embedded KYC tooling; ID + selfie verification
- Enhanced digital mitigations & risk orchestration
- · Real-time booking
- ACH disbursement capture
- Cross-channel integration (branch, digital, call center)
- Common brand & digital platform integration

Coming soon for FIS cores

- · Campaign management at onboarding
- Prefill for existing customers and members

Consumer lending origination features include:

Application & workflow

- · Digital-first origination journey with branch, digital and call center parity
- Workflow management system with exception routing, queues and SLAs
- Prefill pulls customer and member data from existing records to reduce application time
- E-signature & disclosure management with version control and full audit trail

Risk & compliance

- Embedded KYC with biometric ID + selfie verification
- Enhanced fraud mitigations (device, velocity and geolocation)
- · Risk orchestration engine enables policy tuning by product, geography or channel

Funding & integration

- Real-time booking instantly posts loan approvals to core systems
- ACH funding capture secures disbursements at origination
- · Cross-channel integration across digital, branch and call center

Benefits for financial institutions

- · Cut average loan onboarding time from days to minutes
- Lower abandonment rates with a conversionoptimized flow
- · Scale origination across all channels on a single platform
- Reduce fraud losses with multi-layered digital mitigations
- Simplify compliance reporting with audit-ready disclosures and decision logs

Benefits for retail consumers

- · Apply anytime, anywhere with a mobile optimized loan journey
- · Fewer interruptions thanks to a data prefill and automated checks
- Faster funding with real-time booking and ACH capture
