

DIGITAL ONE FLEX

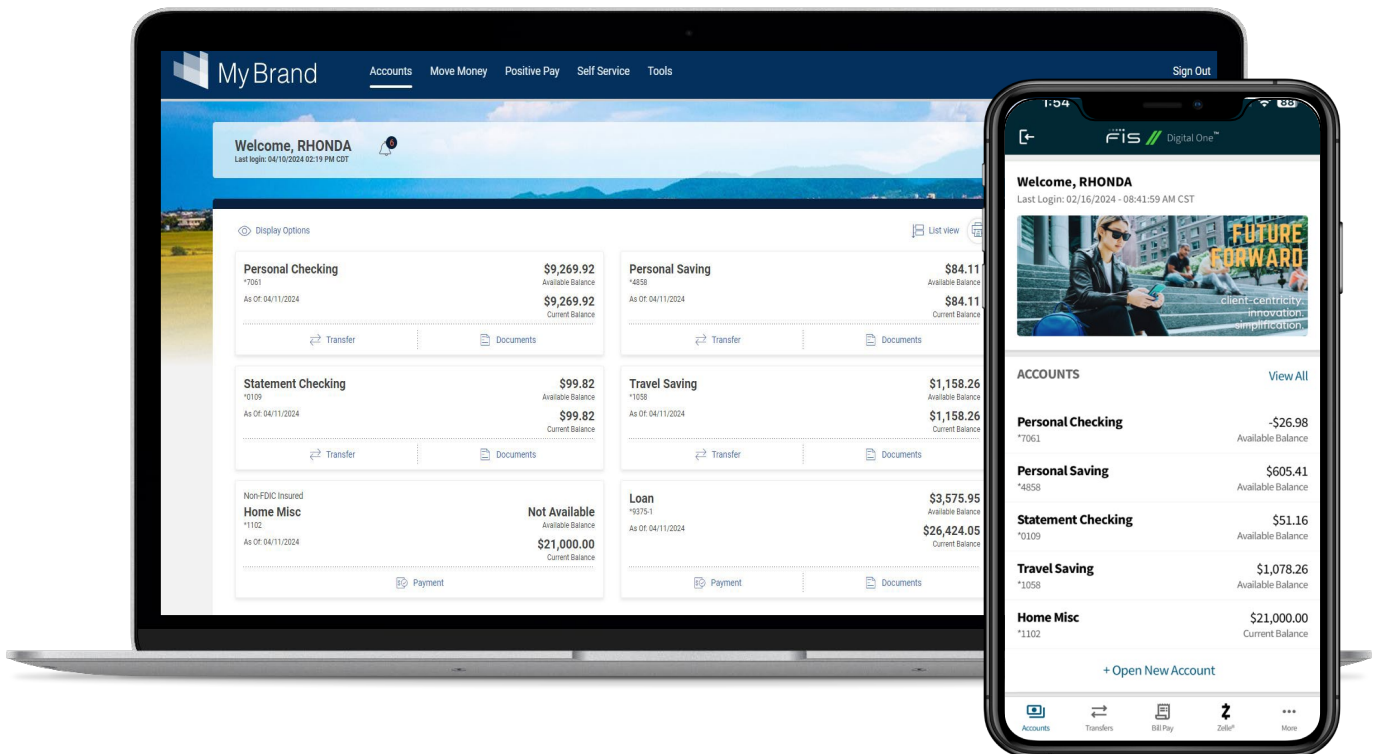

A comprehensive online and mobile banking application built to provide a streamlined experience for your retail and small-business banking customers.

Digital banking for retail and small-business

FIS® Digital One Flex is an online and mobile banking application that supports self-service banking for retail and small businesses. Our solution provides out-of-the-box functionality with little to no configuration needed. Provide your customers with a modern user experience across all digital channels with the functionality they need and expect.

Our flexible platform features both consumer-focused retail banking capabilities, as well as small-business banking capabilities in one product. This modular approach gives you the ability to tailor different experiences for different types of customers. Now you have the freedom to shift from a consumer to a small business to a high-net-worth interaction, making it easier than ever to provide consistently better digital banking for your entire customer base.

Plus, with the Digital One Flex mobile app, you can empower your customers to access and manage their financial lives anytime, anywhere, directly from their smartphone or tablet. Customers have the power to conduct their banking transactions from the palm of their hand, including viewing account balances and transaction history, paying bills, moving money internally or externally, depositing checks and so much more.

Banking features

With Digital One Flex you can offer a consistent, easy-to-navigate experience across your self-service banking channels while including the latest capabilities and rich features that are critical to the success of your customers and your financial institution.
