

DISBURSE PAY

The one-to-many payment solution

FIS Disburse Pay is a business-to-consumer payment solution that offers a secure way for your corporate customer to digitally distribute payments to many recipients with real-time capability.

By leveraging digital payments, businesses can decrease costs, mitigate risk, and offer customers a faster, more streamlined experience.

Solutions Highlights

Easy payment distribution

A file that includes the contact information of your corporate customer's recipients is used to electronically distribute disbursement payments to your payees with a U.S. bank account.

The power of choice

Payee choice is important. Payment recipients can select how they want to be paid. Electronic payment choices made available to deliver payments in real time.

Quick payment notification and secure claim portal

FIS® notifies the recipients in an email or text message with instructions to claim the payment. Recipients can easily claim payments through a secure website hosted by FIS.

Risk Management

With Disburse Pay, Corporate customers will no longer have to collect, store, or maintain sensitive payee bank information for payments to respective payees. Payees can be paid without requirements of sharing banking data broadly.

Ongoing FIS Support

Training before and after implementation, support services, and our comprehensive support through the Customer Support Tool (CST) is provided to our Financial Institution partners to enable quality service to their corporate payers.

Streamline AP payments for businesses and individuals alike
