

MOBILE APP

Retirement Solutions

The **FIS Retirement Mobile App** enables retirement plan providers to offer participants direct access to their account information anytime, anywhere on their mobile device.

Simple and intuitive navigation

The mobile app provides the functionality participants need to conveniently manage their account in real time and track portfolio values 24 hours a day. A simple interface, optimized navigation and biometric login capabilities allow participants to quickly and easily access plan information. The mobile app includes:

- Dashboard display of account balance, contribution and rate of return
- Ability to drill down to view details for the account
- Access to personal information to ensure accuracy
- Multi-factor authentication, including one-time pin and biometric login for quick and secure access

Customized branding

Providing participants with a visually consistent and clear user experience is important. The FIS Retirement Mobile App can be customized with your specific brand logo, color scheme, institution-specific privacy policy and a mobile-specific end user license agreement.

The FIS Retirement Mobile App is made available in the Apple iTunes and Google Play Stores. For more information, contact your FIS relationship manager directly or email us at getinfo@fisglobal.com.
