

GETPAID

Receivables automation

FIS® Automated Finance modernizes and streamlines the office of the CFO. GETPAID'S fully integrated solution helps increase cash flow, improve working capital, and minimize risk.

FIS GETPAID automates your credit-to-cash cycle with AI driven workflows and collaboration tools to improve your business' cash flow. It is built to be managed and run by business users without requiring IT support.

Our suite of Receivables Automation solutions turns finance into a strategic advantage.

GETPAID leverages powerful AI to increase cashflow.

01 Take full control of your risk assessment.

Effective risk assessment requires continuous and thorough monitoring. GETPAID's AI-powered credit risk module evaluates both internal data and information from various credit bureaus to make intelligent decisions regarding credit risk thresholds and to automatically establish credit lines.

02 Match payments accurately and effortlessly.

GETPAID's AI engine learns customer remittance advice layouts through intelligent recognition. The machine learning engine monitors exceptions, learning new posting methods to automatically apply and straight-through process future payments from that customer.

03 Prevent disputes from becoming delays.

GETPAID's AI engine automatically detects deductions and disputes, efficiently routing them for resolution. This speeds up the resolution process and establishes a basis for root-cause analysis and future prevention.

04 Automatically and reliably identify delinquency risk.

GETPAID's AI engine forecasts and evaluates delinquency risk up to 60 days ahead, automatically assigning suitable collection strategies and prioritizing accounts. By leveraging this risk assessment, powered by FIS' Revenue Insight, your team can proactively manage accounts before they become delinquent.

Credit management

- Online credit application
- Automated credit reviews
- Integrated credit bureau data
- Configurable scorecards

Strategic collections

- AI-driven risk-based collections
- Smart prioritization for streamlined collections
- Automated communications enhance workflow
- Real-time ERP interface via API

Deduction and dispute management

- Automatic identification and routing
- Advance workflow with auto-approvals
- Root cause analysis and reporting

Cash application

- Intelligent document and data recognition
- Accelerated machine learning with auto-clearing
- Straight-through processing for all payment types

Collaboration tools

- BillerIQ (EBPP)
- Integrated email & Carla
- Sales & Service Portal
- Two-way API integration for CRM systems

Advanced reporting

- User configurable dashboards
