

VIRTUS FROM FIS FUND SERVICES

Virtus from FIS Fund Services delivers next-level knowledge, service, flexibility and expertise.

The private debt and credit market has grown tenfold in the past decade, and it's time to move past the manual processes that slow your operations and prevent you from scaling for volume. As fund administrators spread themselves thin, specific credit expertise is diminishing. And because they've grown through consolidation, their disparate systems leave fund managers and investors with less responsive, more disjointed service.

Asset managers are under pressure to take strategic leaps in finding new pathways for value creation across public, private and digital asset classes. Investors' increasing sophistication brings new challenges as the landscape evolves, demanding greater transparency, real-time data and multi-asset reporting.

Virtus from FIS® Fund Services takes a technology-driven approach that only a global fintech leader can offer. Our fund services professionals have dedicated their careers to credit and private debt. They're available around the clock and around the globe to bring you capabilities from our full array of product suites. The result is a unique combination of deep credit and private debt knowledge, highly personalized service and flexible, industry-specific technology.

This technology-oriented approach is built into our portfolio accounting, fund accounting, administration and investor services, ensuring more accurate, faster data with unparalleled responsiveness.
