

# Data solutions for financial institutions from FIS and QUODD

Unlock real-time and end-of-day securities pricing

## Financial market data access solutions

By integrating advanced technologies, financial institutions can significantly enhance customer experiences, streamline operations and make data-driven decisions that drive success. Real-time and end-of-day securities pricing across asset classes is crucial, as it provides reliable market data that financial institutions rely on to make informed decisions and maintain a competitive edge.

FIS® strategically partners with QUODD solutions to offer its clients market leading data access solutions. Tailor and manage market data with ease, within a versatile, cloud-based platform.

QUODD's cutting-edge market data solutions, QX Digital Platform and QX Marketplace, offer turnkey experiences that make market data integration simple.

## QX Digital Platform

- Turnkey experience: User-friendly functionality for automating workflows in global security pricing and reference data
- Reduction in friction and operational costs in the back office
- QX Digital is the primary source for global securities pricing for over 200 institutions

## QX Marketplace

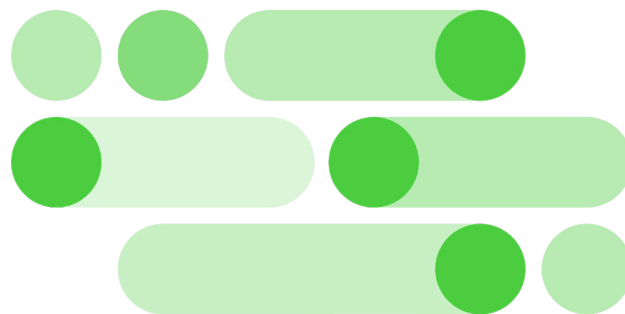

- Programmatic access via APIs and data feeds to seamlessly integrate market data
- Single source for real-time, delayed, historical and reference data for global securities
- Institutional strength APIs and data feeds
- 99.9% availability for equities, ETFs, options, futures and indices

## Transform your operations

Embrace the future of market data with QUODD and seamlessly integrate proprietary and premium content within a flexible, cloud-based platform designed for control and compliance.

- **Customizable market data** – Gain full control over your market data with a flexible, cloud-based platform tailored to your needs.
- **Seamless integration** – Easily connect proprietary content and premium sources into your existing workflows for a streamlined experience.
- **Regulatory compliance** – Ensure adherence to internal risk and compliance requirements with reliable, regulatory-compliant data.
- **Real-time and historical data** – Access high-quality real-time and historical market data to drive informed decision-making.
- **Scalable and flexible solutions** – Adapt to evolving business needs with a scalable platform that supports both data consumption and distribution.
- **Optimized data delivery** – Leverage efficient data delivery methods to enhance performance and reduce latency across your operations.

## Unlock partnerships across the ecosystem

FIS®, a leading financial technology company, partners with financial institutions, businesses and developers to advance global payment, banking and investment systems. Our strategic collaborations help clients confidently run, grow and protect their businesses.

## Key facts

### About QUODD

QUODD Financial Information Services: QUODD simplifies financial market data access, integration and consumption, solving key market data challenges with ease. QUODD's technology empowers you to customize and control your market data, accessing our proprietary content along with premium sources like S&P and FactSet — all within a flexible, cloud-based platform. With regulatory-compliant data, we ensure you meet internal requirements for risk and compliance. Whether you're building or consuming, QUODD makes market data integration simple.

### Key information

2,000+ clients; 150+ market data sources; 250B+ market data points collected

### Financial market data solutions

**QX Digital Platform:** A turnkey experience with easy-to-use functionality automating workflows for global security pricing and reference data. QX Digital eliminates friction and reduces operational costs in the back office. Over the last few years, we have transitioned hundreds of institutions to QX Digital as their primary source for global securities pricing.

**QX Marketplace:** Programmatic access to our content catalog via APIs and data feeds, so you can integrate market data exactly how you need it.

- Single source for real-time, delayed, historical and reference data for global securities
- Institutional-strength APIs and data feeds - the largest integrated suite of market data APIs in the industry
- 99.9% availability for equities, ETFs, options, futures and indices

### Client segments

Banking and wealth management, platform providers, asset servicing, insurance and retirement, institutional asset management, broker dealers and advisory, wealthtech, risk and analytics, fintechs, startups and financial media.

### FIS existing relationship

QUODD currently delivers market data and services to various FIS business units, including:

- The QX Digital Platform and Market Data (Reliance Outsourcing)
- Mutual Fund Data and Mil Rates (Trust Desk)
- Real-time and Historical Interbank and Deposit Rates (FIS Global Trading (Suisse) SA, FIS Global UK and FIS Global - SecLending)

### NEW FIS end-of-day pricing partnership

- End-of-day market data partnership with FIS offering an alternative
- Integration to AddVantage, Charlotte, GlobalPlus, TrustDesk and Investor's View

### Technology

AddVantage will be the first system integrated. Starting in Q2 of 2025, end-of-day pricing will be integrated into the AddVantage Platform as a primary market data source.
