

eZBusiness Card Management

Commercial card is the fastest-growing segment in today's credit card market. Take advantage of this lucrative opportunity while controlling costs, minimizing fraud risk and maximizing efficiency.

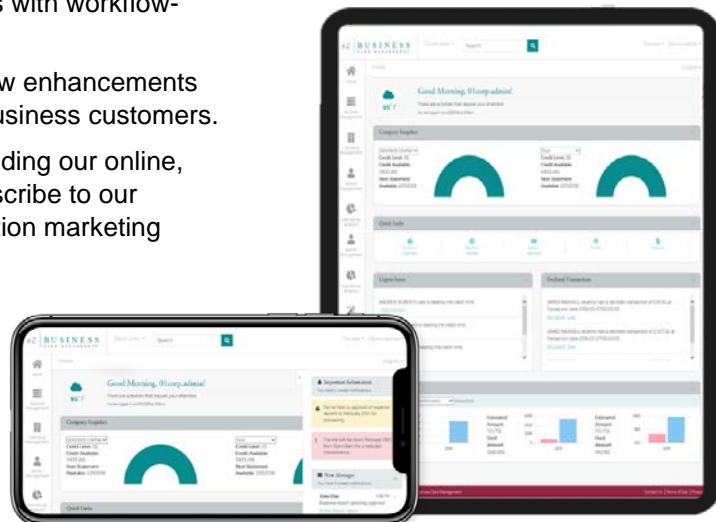

Optimize your commercial or business card program, no matter what your size

FIS™ eZBusiness Card Management allows the corporate or small business card customer to support, manage and oversee their card program.

- Easily allow admins to add new or close existing accounts, activate cards, make temporary and permanent credit limit changes, execute recurring and inter-cycle customer payments and more.
- Manage employee requests, including statement questions, password resets, replacement cards and transaction disputes.
- Streamline the expense reporting process with workflow-based, easy-to-use controls.
- Gain greater control over security with new enhancements designed to protect your corporate and business customers.
- Drive customer card adoption by downloading our online, omnichannel marketing materials, or subscribe to our optional turnkey or fully customized adoption marketing service.

eZBusiness Supports Your Top Priorities

- Tightens controls and approvals
- Reduces internal costs
- Improves cash visibility
- Mitigates fraud risk
- Rationalizes bank relationships
- Lowers your external costs
- Minimizes errors

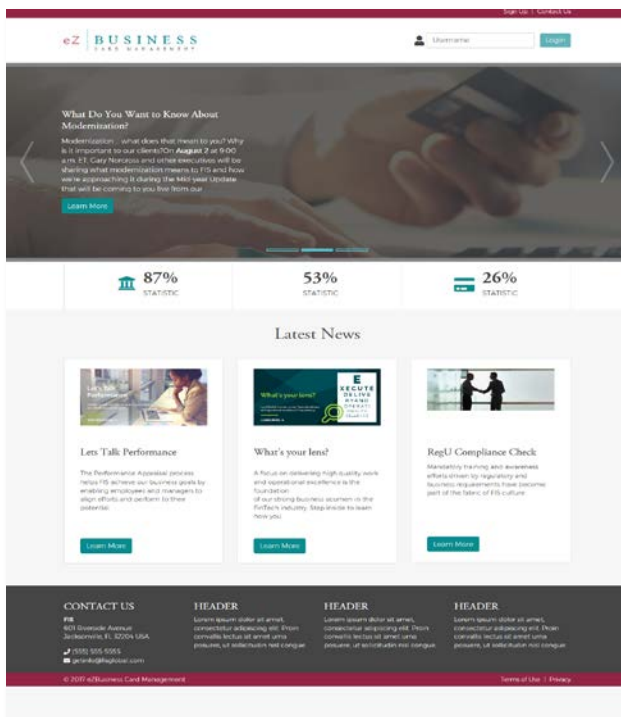

Streamline the expense reporting process

eZBusiness' workflow-based expense management allows your business and commercial customers to assign employees to cost centers, as well as specify general ledger allocations by cost center and expense category. In addition, it provides the ability to easily approve or reject expense reports submitted by employees and generate real-time alert notifications informing them of the status of their reports. Other new features include mileage reporting enhanced by Google Maps capabilities and receipt imaging.

Drive customer card adoption

Marketing messages bombard us every hour of every day. That's why delivering powerful messages to the target user with the right frequency and the right combination of media channels at the right time is critical to driving higher adoption rates.

- Choose the do-it-yourself approach that enables you to download a toolkit of materials for in-branch, print, email, web, digital and social media. These materials incorporate persuasive key messages and are fully customizable to include your logo and branding.
- If marketing resources are limited, FIS can provide turnkey marketing execution. Using materials from the toolkit, we will fully execute and track your multi-channel campaign. Based on incremental portfolio growth, you pay only if the campaign is successful – ask for details.
- FIS can also design a custom campaign based on your unique goals and targets.
