

FIS | CODE CONNECT™

FIS | CODE CONNECT™

FIS has launched Code Connect (codeconnect.fisglobal.com), a new API marketplace to enable developers to build innovative client solutions faster than ever before.

Through Code Connect, developers can access solution-based APIs in several usage categories, including Banking and Wealth, Payments, Institutional and Wholesale, as well as Corporate Solutions. This centralized access to FIS APIs facilitates collaboration and partnerships with financial institutions and fintech companies across the globe to deliver cutting-edge solutions and enable new streams of value for clients, partners and developers.

Code Connect creates a collaborative ecosystem between FIS solutions, banks, and fintech developers, and allows for creation and delivery of a comprehensive suite of products, services, and experiences that go beyond traditional banking.

What is FIS Code Connect

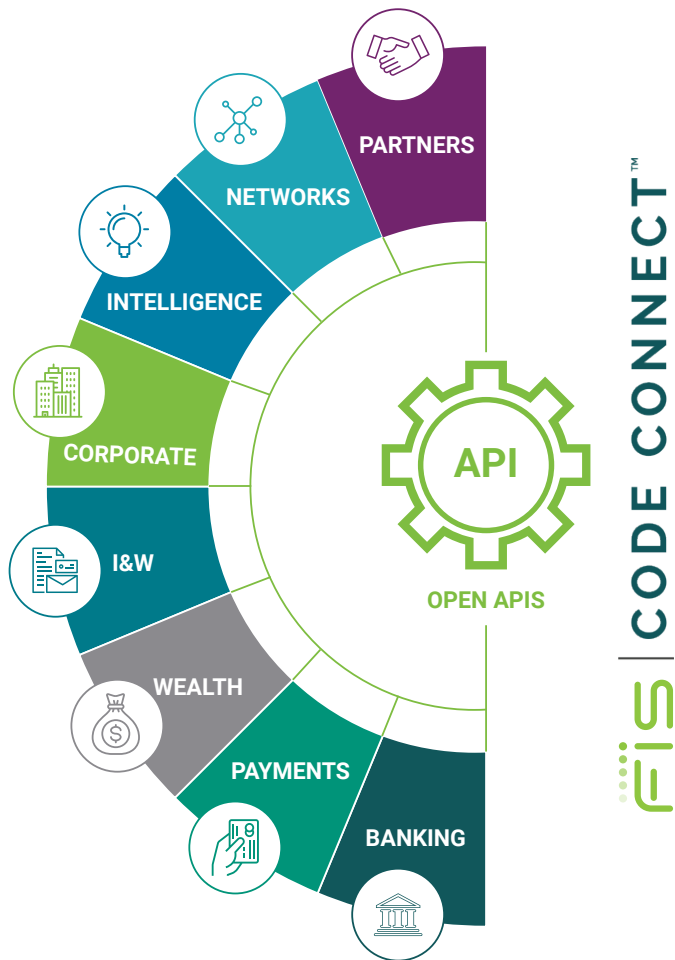

FIS Code Connect is an API platform that provides a central access point for all FIS solutions. In addition, FIS Code Connect allows banks and fintech partners to publish and manage their own APIs, so that they can easily integrate, leverage, and deliver solutions to FIS clients.

Exposing FIS Solutions via APIs

With FIS and Code Connect, developers no longer need to know the details of every system in the enterprise. They can expand their creative reach while focusing on business goals using development tools that enable them to connect to systems and applications that expose functionality through APIs. Leveraging the digital ecosystems that connect them, they can deliver more value to a wider customer base in less time than ever before. Sophisticated integration tools to play in the digital world are no longer needed.

DIGITAL BANKING

- Personal loan
- Mortgages
- HELOC

PAYMENTS

- Bill Pay
- P2P
- Cross-border

CARDS

- Creation
- Management
- Cardless Cash

NETWORKS

- Global ATMs
- Digital Wallets

LOYALTY

- Discounted Fuel
- Retail Rewards

INTELLIGENCE

- Consumer Insights
- Real time Risk & Fraud

Exposing banking and payment solutions, via open APIs, that give financial institutions the ability to pick and choose capabilities that allow them to integrate and build financial solutions to meet their customer needs.

FIS | CODE CONNECT™

Manage the API Lifecycle

Code Connect is an API lifecycle management platform that is optimized for API development, analytics processing, and developer management to increase agility and operational efficiency for your business.

Increase Agility by Rapidly Creating New Digital Assets

Financial institutions need to be able to quickly create new services, either from scratch or by combining existing services, to meet customer needs.

Code Connect enables financial institutions to design and publish APIs in an iterative manner while maintaining full control of the API lifecycle. This helps reduce the time spent on creating your own APIs so that you can deliver services much faster. You can even orchestrate and combine services into one API to build a solution.

A Complete Banking and Payments Platform

As a plug-and-play platform, Code Connect allows multiple point-solutions to connect and interact with each other to help financial institutions define what banking and payments mean to them.

Foundational Capabilities

Foundational set of process engine APIs and architecture framework:

- Cloud-ready Deployment
- Line of Business-focused Modernized Architecture
- New Technology Stack
- REST API Exposed
- Multi-everything Framework
- Real-time, STP Processing

Experience Capabilities

Additional FIS APIs (payments, networks, loyalty, risk, etc.), as well as Bank and Fintech APIs, centrally accessed and managed via FIS' Marketplace - **FIS Code Connect**

Supplementary Capabilities

APIs exposed for enterprise use and include:

- Enterprise Alerts
- Collateral Management
- Limits and Exposure
- Reconciliation
- Regulatory Reporting
- Rate Management

Extended Business Capabilities

- API enablement, developed to externalize business logic out of the core banking engines and extend the capabilities into enterprise components.
- APIs are easily consumed with consistent and context-aware data by any channel.
- Specifically designed to be channel and core agnostic components that aggregate data across FIS and non-FIS core and channel solutions.
- Focused on Enterprise capabilities such as:
 - Customer
 - Product Catalog and Pricing Engine
 - Analytics and Marketing Platform
