

# BASE2000

**The world's leading card processing system is at the heart of FIS Credit Card Solutions. BASE2000® is a globally proven success, handling over 75 million accounts in 20 countries.**

Great software is critical to improving your card processing capabilities, and FIS' BASE2000 card processing software is world-class. But software is only a part of an overall solution. FIS combines the talent technology and experience to provide solutions that address your complete card processing needs.

## **No problems, no limits, no end to our service**

At FIS, we're as flexible as you want us to be. Bring us in at the very start of setting your programs, and benefit from our expertise across the full spectrum of managing a card portfolio. We manage everything, including customer selection, transaction management, account management, and letter and statement fulfilment.

## **Flexible commercial support for your business**

FIS runs a flexible business model. We listen to your requirements, aspirations and challenges and work with you to create the most appropriate commercial agreement. It's an approach that allows you to link your costs to the business model that best suits your organization.

### **BASE2000 at a glance**

- Rapid introductions of new products
- Constantly updated for compliance
- Modular options to suit your requirements
- Range of hosted or licensed business models

## BASE2000 takes care of everything

Make BASE2000® a central component of your success. The platform has a tried and tested pedigree, processing more than 75 million cards in over 20 countries. With a platform of this importance, FIS takes great care in maintaining and redefining BASE2000 to meet the future needs.

### **Financial flexibility**

Enjoy the flexibility to optimize up-front capital costs and choose a billing option that allows you to tie revenue to costs.

### **Local to global**

A single implementation gives real economies of scale. The solution is managed efficiently from our European processing center with full multi-lingual expertise.

### **Support and experience**

We have decades of experience implementing and running BASE2000. In addition to dedicated business and technical experts, you have the support of more than 200 people worldwide.

### **Designed to put customers first**

BASE2000 lets you view your customers as individuals rather than as a series of different accounts. For example, a customer with three cards can be sent one statement instead of three.
