

ClearCommerce

A secure payment gateway with maximum fraud protection

ClearCommerce[®]

Increase Revenue, Manage Fraud & Improve Profitability

Industry leaders trust FIS ClearCommerce[®] hosted and licensed solutions to automate payment processing and safeguard their Card-Not-Present (CNP) business against the evolving menace of fraud. ClearCommerce's complete suite of CNP payment and fraud solutions continues to lead the industry with proven technology, innovative services, powerful data analytics and superior customer support.

Advanced Solutions

As the CNP business grows, the complexity and challenges of managing high-volume transaction processing, ensuring customer data security, and protecting your bottom line against fraud becomes daunting. FIS' ClearCommerce solution offers a suite of advanced analytics.

Accept, Protect & Manage

ClearCommerce enables merchants to efficiently accept, protect and manage card-not-present payment transactions

- Supports multiple transaction environments
- Flexible hosted and licensed delivery options
- Automated processing of all major payment methods and currencies
 - Able to accept Level II and Level III data
 - Supports recurring payments
- Advanced arsenal of fraud prevention tools, technologies and services

Your Enterprise Payment Platform

Offering:

- payment acceptance
- payment risk management
- payment security management

Payment Processing

ClearCommerce payment processing services are designed for high-volume enterprises that require robust, highly reliable and secure transaction processing. ClearCommerce supports all payment methods with no currency limitations. All transactions are processed securely and in real-time, whether online, via your call center or from a point-of-sale device.

Virtual Terminal - Accept a debit or credit card from any computer or device. Simply connect to the internet and accept payments wherever your business may go!

Consumer Information Profile - The Consumer Information Profile helps to support Payment Card Industry (PCI) compliance initiatives by securely storing your customer data off-site. Though our secure servers, FIS will vault and store this sensitive customer data, reducing risk of exposure.

Hosted Payment Page - Securely accept payments online hosted through FIS. Provide a seamless checkout experience while maintaining PCI compliance.

Fraud Management

ClearCommerce is the most accurate and effective service available to protect against fraud attacks, minimize chargeback losses and improve the profitability of your CNP channels. Our fraud management suite delivers a powerful arsenal of fraud detection technologies.

Order Review

ClearCommerce includes the most comprehensive and flexible order review service designed to specifically automate and simplify the process of reviewing suspicious orders and making accurate decisions. Using an all-in-one dashboard, review analysts quickly evaluate pending orders with a workflow tuned to your business, ensuring that all relevant data is available and used in decisioning.

Your Trusted Gateway

Since 1995, ClearCommerce has supported some of the largest online retailers and government entities with premier security and connectivity for payment card and ACH processing. Backed by FIS, ClearCommerce continues to excel at making electronic transactions safe, simple, and secure.
