Automating Financial Reporting for Fund Complexes of All Types and Sizes

In the face of heightened investor demands, regulatory scrutiny and pressure to reduce expenses, asset managers need precise, consistent and timely financial reporting. But creating financial statements for annual or quarterly reporting is often time-consuming and resource-intensive.

Advanced technology holds the answer, allowing you to meet your requirements while saving time, increasing control, enhancing data integrity and reducing pressure on staff.

A flexible and scalable system, FIS® Financial Report Manager quickly simplifies and automates financial reporting for fund complexes of all types and sizes.

With data exports to any location, Financial Report Manager can easily accommodate the ever-increasing volume and complexity of schedules of investments, financial statements and notes for mutual funds and alternative investment funds. Its intuitive, rules-based user interface features multi-tiered security access that enforces organizational controls. And with no desktop installations, plug-ins, add-ons or applets required, it’s rapidly deployable.

**INCREASE CONTROL**
Get a better grip on the financial reporting process with excellent traceability, exceptional data management and automated references.

**ENHANCE DATA INTEGRITY**
Increase your confidence in the accuracy of your reporting with a modern, automated platform that was built with data integrity at its core.

**ACHIEVE SIGNIFICANT TIME SAVINGS**
Cut the time it takes to produce annual financial reports by one-third to one-half with easy integration with your accounting systems.
FIS FINANCIAL REPORT MANAGER
Automating Financial Reporting for Fund Complexes of All Types and Sizes
