

CONTROL CENTER: Workflow & Process Automation

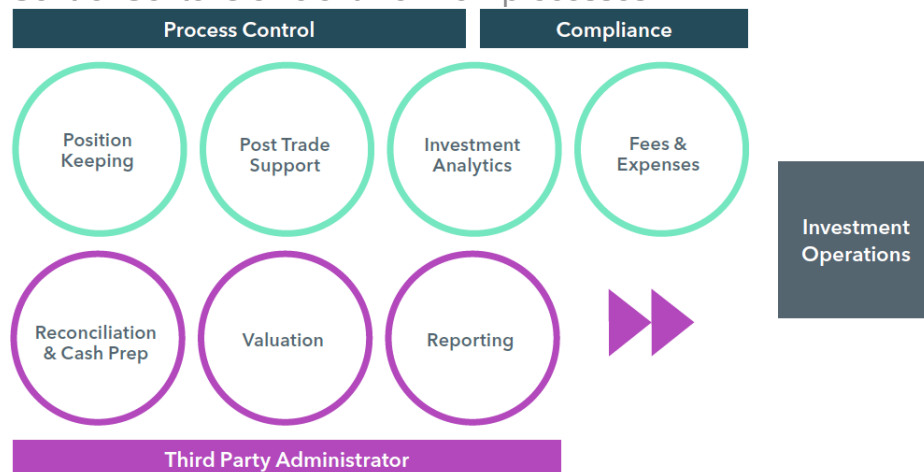

A solution of the Investment Operations technology suite

Simplifies complex operational processes with efficiency, control and transparency

It's time to achieve greater control and automation over your processes. Control Center converts your paper operational control sheets into distributed, automated work processes with easy-to-read dashboards and sophisticated work allocation capabilities. With a centralized view of all concurrent work streams across teams and locations, users can also monitor and track progress against operational milestones.

This Software as a Service (SaaS) offering delivers efficiency, control and transparency to any work process that is performed and managed by multiple people. Control Center brings a new level of management oversight and control to operational processes allowing users to shift focus from cumbersome manual methods to more streamlined tasks.

Control Center's efficient workflow processes

Rich Functionality

- Create and update operational processes
- Automation platform orchestrates human and system interaction
- Dashboard views of all cross-organization activities
- Multiple work allocation methods
- Integrated virtual documents folder
- Critical next-step alerts
- Real-time status to all stakeholders across locations
- Supports your role nomenclature
- Eliminates manual information gathering

CONTROL CENTER: Workflow & Process Automation

A solution of the Investment Operations technology suite

Why Control Center?

Greater Control

Better control over processes allows users to shift focus to urgent tasks, which increases efficiency and reduces operational risk.

Operational efficiency

Provides real-time status to all stakeholders eliminating manual information gathering.

Automation

Connects to other systems and operates as a central hub for orchestration of the full life cycle of any operational process.

Risk reduction

Increases transparency on all operational activities.

Flexibility

Interoperates with third-party systems.

Customization

Supports design of processes by business users.

Proven

Delivered via FIS Software as a Service (SaaS) model.

Auditability

Centralized controls and documents create a consolidated, online audit package.

User-friendly

Gives clients a centralized view of all asset servicing activities.

Simplifies work flows

Converts complex work processes into manageable electronic control sheets and easy-to-read dashboards.

FIS' vision for fund administration

Ultimately, through our Investment Operations suite, FIS aims to deliver technology assets and services that help you thrive on a global scale in today's fast-evolving markets. We will continue to do so by developing best practice, agile operations that allow you to move rapidly into new markets, grow your asset base and improve performance. At the heart of the ecosystem is a single, powerful source of data, feeding into and connecting with our comprehensive range of middle- and back-office solutions. By helping translate disparate outputs into meaningful information for multiple purposes, it will allow you to meet complex data requirements in the name of ongoing growth.

About FIS' Investment Operations

FIS Investment Operations is a global suite of products and services for asset managers, institutional investors, and traditional and alternative fund administrators. Investment Operations supports the entire investment process, from portfolio management, risk management and compliance to investment accounting, transfer agency and client reporting. Combining deep functionality with broad business process management capabilities, FIS helps investment firms manage complexity, increase efficiency, and respond quickly to changing business and regulatory requirements.

About FIS
