

# FIS Integrated Payables

Transform your Accounts Payable department from a cost center to a revenue generator

FIS™ Integrated Payables is a web-based integrated payments platform that can take a payment feed from your Accounts Payable (AP) group and process it as checks, ACH, wires or cards through a single online portal. By streamlining the AP process, FIS Integrated Payables increases revenue while reducing AP costs and fraud.

## Why Customers Say “Yes” to FIS Integrated Payables

### Streamline the payment process

Execute payments as a check, ACH, wire or virtual card

### Increase revenue

Convert check transactions to card transactions which are eligible for a rebate

### Reduce cost

Reduce internal labor costs, and costs associated with printing and mailing checks

### Mitigate fraud

Implement various controls to mitigate fraud, including submit, review and release capability

**“We were amazed at the number of vendors and amount of dollars that came through the vCard program and it literally paid for our AP process and more.”**

– James Dunlevy  
AP Leadership Team, WinWholesale

AP Payments to Vendors

## Win with FIS Integrated Payables

With 50 percent of companies still using checks for B2B payments, annual check processing costs top \$25 billion. Lack of resources, vendor bank details, poor management of remittance data and fear of risk discourage migration to electronic payments. Integrated Payables can help by providing a single, centralized system for payments processing and outsourcing that can unify systems. Consolidation into an adaptable central payments platform not only brings efficiency gains, but also increases straight-through processing levels and end-to-end enterprise-wide transparency.

FIS Integrated Payables provides payment execution services for all payment types for a variety of industries and state and local governments. FIS' payment execution services include traditional check printing and delivery in a secure facility as well as the migration of vendors to ePayments and the associated processing of electronic payments such as ACH, wires and virtual cards.

## Vendor Enrollment Service

FIS Integrated Payables is a turnkey solution that provides a U.S.-based vendor enrollment center focused on creating custom, tailored campaigns to migrate your vendors. An easy-to-use self-enrollment website is available for vendors to indicate their preferred payment method. Vendors provide and maintain their banking information for payments without any involvement from the payer.

## Vendor Support Center

Acting as an extension of your AP department, FIS will support your vendors with the Integrated Payables call center. Our call center representatives manage inquiries, card processing issues, technical support, bank account maintenance and more.

## Reduce Payment Costs

FIS Integrated Payables can reduce costs through address cleansing and postal sorting, producing the lowest possible postage costs. Job splitting allows the printing and mailing of select items, while providing the option to display other items online. Customers and their vendors can easily view payment and remittance documentation in PDF format.

## Virtual Card

Credit cards can provide another electronic settlement payment method. FIS Integrated Payables utilizes virtual cards for card payments. This method allows the payer to issue a specific card number for one-time use to a specific vendor, for a specific value. Not only is this a highly secure method, Virtual Cards come with the added benefit of rebates. Rebates from virtual card payments can turn a cost center into a revenue center.

## Security

Availability and security are designed into each FIS solution. Understanding the importance of data privacy and security, FIS has developed a complete infrastructure designed to provide extensive security and control over payment and remittance data received from our customers. The FIS Integrated Payables Solution is compliant with the Payment Card Industry Data Security Standard v2.0 (PCI DSS).
