FIS DIGITAL INVESTMENT ANALYTICS

Formerly FIS Private Equity Rainmaker

White-glove portfolio company data collection and validation services

In private equity, getting an edge hinges on your ability to make the best decisions based on comprehensive data and analytics. But it’s challenging and time-consuming to convert unstructured and incomplete portfolio company data into standardized data that you can use to drive smarter investment decision-making.

ENHANCED PERFORMANCE AND REPORTING

FIS® Digital Investment Analytics (formerly FIS Private Equity Rainmaker) is a technology-enabled portfolio monitoring service. Digital Investment Analytics automates data management processes and streamlines portfolio analysis to provide deal teams with the transparency they need to make investment decisions that deliver growth. Digital Investment Analytics uses data visualizations and a white-glove service model to give you the ability to view and assess trend analytics and identify risks across your portfolio.

Digital Investment Analytics incorporates Preqin benchmark data, the industry’s most trusted and transparent benchmark. With performance information for over 11,000 private capital funds, you can evaluate fund performance, analyze strategies and geographies, and make comparisons to your peer groups.

UP-TO-DATE PORTFOLIO DATA

Our portfolio support team provides white-glove data collection and validation services, so you can spend more time on making investment decisions.

TREND ANALYTICS AND RISK ALERTS

Consolidate and review your aggregate and segmented trend analytics and surface outliers and risks via data visualizations to quickly make decisions that drive alpha.

COLLABORATION TRACKING

Collaborate across internal and external parties, with a full version history of all additions, notes and commentary so that you can track changes as the process advances.
