

MANAGED SERVICES

For Post-Trade Derivatives

FIS provides the foundation for differentiated growth

The cost of supporting derivatives clearing requirements continues to be under tremendous pressure.

For clearing firms of all sizes, the ability to **reduce operational cost, effort and risk** associated with key post-trade requirements provides one of the only opportunities to refocus resources onto strategic, client-facing initiatives to **drive business growth**.

FIS managed services comprehensively support clearing operations, applications, infrastructure and projects across all post-trade business functions.

Clearing firms can rely on FIS managed services to **deliver non-differentiating business functions “as a service”** and choose combinations of functions and service levels aligned with their specific business requirements.

FIS managed services are built on **current and future underlying FIS software assets** including our flagship next generation real-time platform, FIS Cleared Derivatives (FCD).

Clients benefit from **industry leading FIS strengths** as the market leader in derivatives processing, with more than 35 years of experience and a team of more than 1,250 experts world-wide. Additional FIS-wide strengths include the highest standards for service delivery, significant investments in “as a service” expansion across financial services and leading cybersecurity and risk management practices, infrastructure and tools.

As the leading provider of derivatives clearing managed services, FIS offers **flexible scoping options** for non-differentiating post-trade functions delivered “as a service”:

FIS managed services provided support for:

- Infrastructure
- Applications
- Operations
- Projects

MANAGED SERVICES

For Post-Trade Derivatives

What We Offer

The infographic is a vertical stack of three colored boxes. The top box is dark blue and titled 'Operations Managed Services (OMS)'. It features four white icons of human heads with gears inside. The middle box is green and titled 'Application Managed Services (AMS)'. It features two white icons: a computer monitor and a server tower. The bottom box is light green and titled 'Infrastructure Managed Services (IMS)'. It features a white icon of a database cylinder. Each box contains a list of service items.

Operations Managed Services (OMS)

- Client Directed Change Projects

Infrastructure Managed Services (IMS)

- Hardware and Operating System Management
- Database and Storage Management
- Networking, Connectivity and Messaging Management
- Incident Troubleshooting and Resolution
- Infrastructure Availability and Continuity Management

Key Advantages

FIS post-trade derivatives managed services make it easier for you to differentiate and grow your business. You will benefit from:

Increased efficiency

By refocusing resources on strategic, differentiating initiatives, your firm will be able to focus on new business opportunities and client service.

Decreased total cost of ownership (TCO)

FIS economies of scale deliver non-differentiating requirements for less effort, risk and cost, which provide a more economical, predictable and sustainable operating cost structure for your firm.

Reduced operational risk

Industry standard processes, technology and scale along with robust service management and service level options allow your firm to remain up to date with regulations and other industry requirements, while improving resilience.

Improved security and compliance

Our rigorous security policies, procedures and infrastructure ensure you remain protected under the highest cybersecurity standards to mitigate the risk of sophisticated current and future threats.

Streamlined Onboarding Process

Existing FIS clients can easily expand their services relationship with FIS through a standardized onboarding process from scoping and contracting through transition and go-live.

MANAGED SERVICES

MANAGED SERVICES

For Post-Trade Derivatives

About FIS Operations and Technology

FIS empowers investment banks and securities brokers around the world to adapt and react to market challenges and opportunities, regulatory changes, and global complexities to foster increased profitability and competitive advantage. With deep and broad industry expertise across securities as well as exchange traded and cleared OTC derivatives, FIS delivers a cross-asset solution suite that automates middle- and back-office processes and workflows including derivatives reconciliation with exchanges and central counterparties, and daily settlement and contract data coverage for more than 80 derivatives markets. FIS' post-trade clearance and settlement solutions drive process and data standardization and integrate with other FIS solutions including investor and advisor platforms and new account onboarding as well as trading, securities financing, collateral management and risk and compliance. FIS' proven managed services enable firms to transform the economics, scale and efficiency of their clearing businesses by reducing operational complexity, risk and cost.

About FIS
