

FIS DIGITAL ONE ACCOUNT OPEN

Start every customer relationship right with easy, fast account opening.

Enhance your customer relationships from the very start.

Consumers today expect seamless, simple digital interactions. But the process of opening a new account can often be a frustrating one. The experience is often fractured, requires excessive data entry, and ends with the consumer calling or making a trip to the branch to complete the process.

Give your customers a lasting first impression, with FIS Digital One Account Open.

Digital One® Account Open is a true omnichannel solution, offering a cohesive experience for your customers and your bankers, across all channels and devices. This means your customers and employees see the same information – always. It's fast, easy and paperless.

Benefits

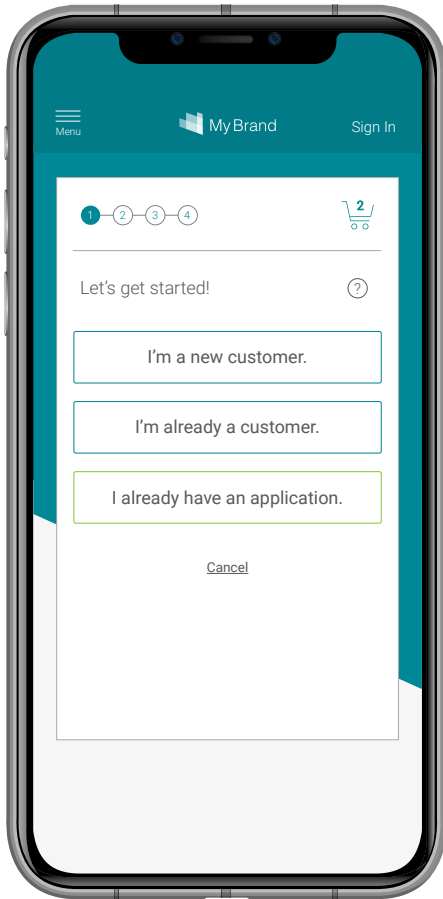

For your customers

- Open new accounts in minutes via any channel, including online, mobile, branch, kiosk or contact center.
- Create a consistent experience across all channels.
- Reduce shopping cart abandonment and allow for multiple accounts to be opened without additional data entry.
- Enable a fast cross-sell path for existing customers.
- Activate complementary features such as a debit card, eStatements and more, while opening an account.
- Save and return to complete a transaction using any channel.

FIS DIGITAL ONE ACCOUNT OPEN

Start every customer relationship right with easy, fast account opening.

For your financial institution

- Increase account opening success rates through real-time processing and the ability for employees to view pending application notifications and insights.
- Facilitate continuous customer engagement through integrated and unified channels.
- Enable self-service and employee-assisted transactions on a single platform powered by a digital open-banking API.
- Achieve compliance with comprehensive identity verification and screening procedures.
- Add and configure new products without having to make code changes.
- Allow ongoing innovation and seamless integration with best-in-class technology.
