

FIS DIGITAL ONE MOBILE

Enhancing customer relationships through FIS Digital One.

FIS Digital One™ is a solution of integrated banking modules that deliver a truly modern banking experience for both your customers and your employees, with a unified user experience and real-time access to customer, account and transactional data across banking channels. FIS Digital One Mobile leverages native app support for iOS and Android in a compelling user experience and supports future features like chatbot and AI conversations.

Win with mobile.

Digital One Mobile empowers financial institutions to win with mobile. We deliver the mobile features, extensible technology platform and strategic vision to attract and delight customers, both now and in the future. The solution is part of FIS' seamless, simple digital experience that leverages one platform - FIS Digital United.

Digital One Mobile provides the functionality your customers know and love, from viewing balances to searching transactions to making transfers. We also offer a breadth of highly innovative features to differentiate your institution and delight customers. Our leading user experience provides a fast, easy and simple interface through its optimized navigation, streamlined transaction flows and rapid performance.

FIS DIGITAL ONE MOBILE

Key Features.

MOBILE CHECK DEPOSIT

Snap a picture of a check. Processing is secure, rapid and extensive. Deposits are faster, easier.

BILL PAY

Select the account, choose payee, enter amount, touch pay. Pay the mortgage, utilities and rent on the fly.

ZELLE P2P

Send on-demand mobile payments to anyone with an e-mail address or mobile number through a variety of methods.

LOCATION SERVICES

Search nearby branch and ATM locations. Enable customers to find what they need faster.

MESSAGING

Receive in-app alerts for low balance, overdraft, fraud and promotions. Push notifications and message center make it easy.

CREDIT CARD

Connect customers with their credit cards through a standalone app or as part of an integrated app.

MOBILE COMMERCE

Deliver a bank-branded mobile wallet. Credit, debit, integrated loyalty offers and rewards. Use at POS, online and more.

CARDLESS CASH®

Pre-order cash anywhere, any time. Withdraw cash at ATM quickly, securely with a QR code – all without using a card.

DIGITAL MARKETING

Engage users with in-app space for marketing, cross-selling and promotions. Enable mobile to generate revenue.

EXTENSIONS

Surface new mobile features from FIS and other third-party providers through our extensible application platform.

METRICS INTELLIGENCE™

Better understand customers through KPIs for adoption, feature penetration, device usage and much more.

BIOMETRIC AUTHENTICATION

Allows users to access specific features and account information with their fingerprint and via face recognition.

Embrace open solutions. FIS Digital One Mobile is an extensible solution that allows you to leverage new innovations and connect with other platforms.

FIS Digital One Mobile has partnered to deliver the following in-market features:

- **Debit card controls:** Provide customers with the ability to enable or disable the use of their debit cards.
- **Digital receipt capture:** Capture and manage receipts from your mobile phone
- **Personal finance management:** Empower customers with access to robust finance management tools from directly within the app.
- **Appointment scheduling:** Allow customers to book appointments for specific banking purposes at the branch of their choice.

FIS DIGITAL ONE MOBILE

Enhancing customer relationships through FIS Digital One.

- **Premiere customer support with live chat:** Enable customers to engage with customer service to assist with sales and support.
- **Apple Pay provisioning:** Allow mobile banking customers to manage their Apple Pay debit and credit cards from within the mobile banking app.
- **Financial calculators:** Enables users to quickly enter their information and receive calculations by interacting with simple and easy-to-use calculators for loans, savings goals, CDs and credit cards.
- **Social media integration:** Directly integrate social media into branded mobile experience to better connect with customers.

Security

Digital One Mobile offers superior security via multi-factor authentication, SSL encryption, complex device identification and timeout, user entitlements, passcode, and flexibility to support the unique standards of each institution. Our advanced security features give customers and banks the peace of mind that their data and transactions are safeguarded.
