

# CARDPRO EMV ASSURANCE

Creating cost certainty for mandated  
EMV projects with your CardPro BINs

## What is CardPro EMV Assurance?

CardPro EMV Assurance is a flat-cost program created to remove the unpredictability of individual project billing and solidify cost predictability for your EMV projects.

We understand that our clients are required to perform many activities related to EMV and their BINs that cause frequent billing on a project-by-project basis. You likely prefer cost certainty each month, and EMV Assurance ensures just that.

EMV Assurance covers a wide variety of projects that would previously have been billed on a per-project basis, all for a flat, monthly cost of \$250 per BIN.

## What does EMV Assurance cover?

Project types covered under EMV Assurance include:

- Profile Configurations
- BIN Configurations
- EMV Chip Migrations
- Brand Updates
- Migrations from Chip-Only to Contactless
- CVN (Cryptogram Version Number) Updates
- ODA Certificate & Retrieval and Release to support offline authorization and dual interface
- Key Generation, Key Exchanges and Key Imports/Exports
- Mastercard OBS Key Exchange
- EMV Chip Transaction Testing & Verification

## Why EMV Assurance?

- Includes **ten different project types** covered under **a single monthly fee**
- 6-to-8 Digit BIN Migrations mandated by the card brands means **more projects for more BINs are coming soon**
- Lock in a per BIN monthly fee to **turn variable costs into fixed costs**

## *WHERE TO GO FOR MORE INFORMATION*

If you have any questions regarding the EMV Assurance fee, please enter an FIS Client Portal support ticket or contact us at **844.6 FIS NOW** or **844.634.7669**. Please have your Entity ID available for security validation. To view your EID#, click on your username in the upper right corner of the FIS Client Portal landing page.
