

ACBS DataMart and ACBS RealTime

Business Intelligence Modules for the Commercial Lending ACBS Product Suite

ACBS Business Intelligence offers information management for the executive or analyst in the front office and the back office, integrating on-demand reporting, ad-hoc query and analysis, multi-dimensional analytics, and dashboards into all aspects of the commercial lending business. The ACBS DataMart and ACBS RealTime modules deliver immediate 360-degree, web-enabled views of ACBS information addressing operational, tactical and strategic business needs.

ACBS DataMart

ACBS DataMart enables business users to intuitively access and analyze comprehensive historical trending and analytical reporting to address your organization's strategies for revenue growth, risk management and customer relationships.

ACBS DataMart incorporates more than *100 customizable customer and product centric business models* that allow monitoring of key performance indicators within such areas as risk management, profitability analysis, operational analysis, planning, and customer management. By examining *more than 6,500 data elements*, these models make it possible to get exactly the information view you need without waiting for IT to process it on a request-by-request basis.

ACBS RealTime

A crucial success factor to the commercial banking enterprise is accessing and evaluating mission critical intra-day information to optimize and improve operational processes. To maximize the value of ACBS information, ACBS RealTime increases commercial lending operational management efficiencies by providing easy up-to-the-minute real-time query and reporting capabilities for managers and users.
