Why integrated payments?

Faster

One transaction at the POS helps speed transactions, shorten checkout lines and improve the customer experience.

Safer

More secure processing using the latest payment technologies helps reduce fraud, chargebacks and the risk of data theft, improving profitability.

Easier

No need to match reports from the terminal to the POS, reducing duplicate accounting efforts and the risk of incorrectly entered amounts that can lead to chargebacks.

Plus, you can get help when you need it with Worldpay's one-stop payment customer support, 24/7.
